Mid South Drilling, Inc. is a family owned company with a big heart.

Mid South donated its time, services and material to help build the track field for South Davie Middle School in Mocksville, NC. This was one of the only schools in the area without a track field. Sauls Seismic, Inc. was proud to join them in this community endeavor, donating our time and services for this project as well.

Sauls Seismic, Inc. www.saulsseismic.com has had the opportunity to work with Mid South Drilling on many jobs, providing them with seismic services including pre-blast surveys and vibration monitoring. We have found Mid South to be true professionals in their field and provide quality work. We've worked with them on such notable jobs as the Adidas Plant in Spartanburg, SC; Diamonds Keep in Archdale, NC; Lowes Headquarters in Mooresville, NC; the BMW Plant in Greer, SC, and many other projects.
